

Dear Jane and Lucy,

Thanks for inviting us to EFW, it was an amazing day out.
Everyone was so shocked when you told us all the facts about rubbish.

I really enjoyed the tour because we saw the fire and all the rubbish being burned. I remember the lift being more stinky last time but this time is wasn't too bad.

My favourite activity was the circuits made from fruit, wires, zinc and copper. I loved when we got to join our circuits together, also when we weighed ourselves on the lorry scale.

I learned that the fire gets heated up to 1000 degrees!!!

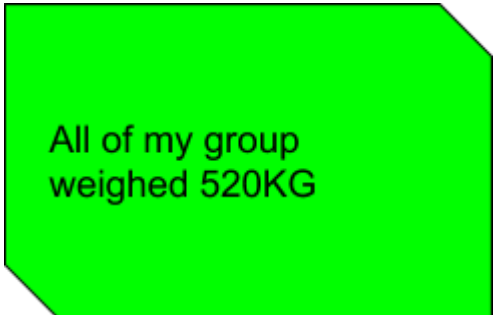

I loved seeing the lorries empty out the rubbish.

Roughly 60 lorries a day come and go to empty their rubbish!!!

I would like to know many women work there in total?

The crane can hold up to the weight of 8 cars!!!

All of my group weighed 520KG

Yours sincerely Maisie, age 9
